

WGL's All HouseCode X10 Transceiver, the V572A a must for Reliable X10 RF control

A multiple housecode RF Base for use with X10 wireless remotes.

from X10's Wireless Transceiver Module instructions:

"you will need 1 Transceiver per house-code setting. For example, if you have all your interior lights on House Code A, all your exterior lights on House Code B, and all your wireless cameras on House Code C, you would need 3 Transceivers."

If you have need of 8 house codes, you will need to buy 8 transceivers from X10, **or one V572A from WGL.**

The V572A All Housecode Transceiver comes complete with: PSC05 power line interface, 12' coax cable, antenna, power supply and RS232 cable
